**COMPACT SOLUTIONS ALLIES WITH BULL TO DELIVER TELECOM
ENTERPRISE DATA SOLUTION**

*One of Poland's Largest Telco Selects Compact and Its Ab Initio Expertise for Design and
Implementation of Enterprise Data Warehouse*

Chicago, IL – May 16, 2007 – Compact Solutions, innovator of high-performance solutions to industry's toughest information integration problems, today announced it has teamed with Bull, one of Europe's leading IT companies, to deliver a strategic data warehouse solution for one of Poland's largest telecommunications providers.

Compact Solutions is the world's largest company specialized in creating strategic data solutions based on Ab Initio technology. Working through its London subsidiary, Compact is currently working with Bull to develop a data warehouse solution that will house data from all aspects of the client's business. Information housed and safeguarded by their solution will include customer, network, subscriptions, billing, and call data.

"We are very pleased at the opportunity to work with our colleagues at Bull," said Pankaj Agrawal, Compact Solutions' chief executive and technology officer. "The design and implementation of a data warehouse of this magnitude and complexity is an excellent fit with our skill set, and our collaboration with the talented members of the Bull team is yielding excellent results."

Key to the selection of Compact for this project is the company's world-class proficiency in a combination of mission-critical technologies. In addition to a track record of success with Ab Initio technologies, Compact Solutions provides world class expertise in every aspect of large scale data integration. These skills include data architecture, data warehouse assessments, data warehouse design, ETL design and development, metadata repositories, data warehouse performance optimization, and platform migration. To help ensure its clients' ongoing success, Compact has also developed a collaborative project approach and has created its Data Management Center of Excellence to serve as a resource beyond solution deployment

About Compact Solutions

Compact Solutions, LLC engineers and implements high-performance Enterprise Information Integration (EII) solutions designed to manage and integrate massive amounts of information to meet industries' toughest challenges. The company's finely honed expertise has yielded a streamlined approach that

delivers solutions in unprecedented timeframes, contains client costs, and yields rapid, sustainable return on information. As part of its repertoire, Compact specializes in Ab Initio-based data management solutions, allowing the company to develop deep skills in all aspects of Ab Initio technology, and earning it the trust and confidence of clients and the Ab Initio team alike. Headquartered in Chicago, with offices in London and Krakow, Compact Solutions' clients include some of the world's largest corporations in Manufacturing, Retail, Telecommunications and Financial Services.
