

### Why Compact Solutions?

- Real-time access to critical data
- World-class technology
- Superior Speed to Value: rapid solution development & deployment
- Field proven method -- down to a science
- Exceptional skills
- Knowledge transfer
- Offshore development options

### EII Assessment Results

- Improved enterprise data sharing
- More flexible EII environment
- More efficient offshore processes
- Increased application quality and performance
- Reduced time to delivery
- Reduced production issues
- Improved EII metrics and measurement
- Enhanced application performance

### Compact Services

Complete Enterprise Information Integration (EII)

- Diagnostics
- Solution Development (off-shore or on-shore)
- Data Architecture
- Master Data Management
- Data Quality
- Real Time EII
- Systems Architecture
- Data Warehouse Assessment
- Data Warehouse Design
- ETL Design & Development
- Metadata Management & Repositories
- Data Warehouse Performance Optimization
- Platform Migration

### Unique EII Expertise

- Design & Development
- Metadata Systems
- Application Migration from between ETL Platforms
- Continuous Flow Processing
- Metadata Driven ETL
- Performance Optimization
- Data Profiling and Data Quality
- Center of Excellence (COE) Development
- Project and Staff Mentoring

## Enterprise Information Integration Assessment

To effectively compete in your market you must be able to bring all of your company's knowledge to bear using Enterprise Information Integration (EII) practices. Compact Solutions has assisted dozens of companies in improving their EII capabilities through improvements to single systems as well as enterprise environment improvements. We have documented these practices in our 6D™ Delivery Model, which we leverage extensively in our work.

The Compact Solutions' EII Assessment allows you to take advantage of Compact's expertise in information integration by comparing your practices with Compact's 6D best practices. The EII Assessment recommends practical and measurable improvements to enhance your information integration capabilities.

The EII Assessment can be performed with a variety of scopes: enterprise-wide, business unit, functional group, or even single system. During the assessment one or more Compact consultants conducts a combination of interviews and environment inspections. Our approach is to focus on identifying bottlenecks and problems in your current environment for improvement. The following aspects of your practices are reviewed:

- Company, group or system goals and objectives
- Integration architectures and technologies
- Current integration approaches and systems
- Staff and organization
- Technical environments (development, test, production)

A report and executive presentation are provided at the end of the assessment, detailing gaps between your practices and Compact's best practices. Benefits of adopting the improved practices are provided and quantified when practical.

Typical improvement areas include: communication of EII goals across the enterprise, EII technical architecture, off-shoring processes, system development processes such as requirements gathering, production system tuning to increase processing performance.

The duration and cost of an EII Assessment varies with the scope of the review. An assessment on a single system may be performed by a single consultant and last a week. An enterprise-level review may be performed by a team of technical experts and last a few months.

Compact EII Assessments yield immediate value and benefits. Most assessments yield many recommendations that can be implemented with little effort and have measurable impact, creating quick wins: infrastructure tunings and simple process changes for example. Recommendations that require structured projects for implementation are implemented by our customers, by Compact's consulting group or a combination thereof. Improvements are also frequently made in the context of EII project work.

Companies in many industries have benefitted from Compact Solutions help with their information integration practices: financial services, telecommunications, retail, and others. Let us show you how we can shed light on your EII environment through an EII Assessment.
