

Why Compact Solutions?

- Real-time access to critical data
- World-class technology
- Superior Speed to Value: rapid solution development & deployment
- Field proven method -- down to a science
- Exceptional skills
- Knowledge transfer
- Offshore development options

Solution Technology

- High-throughput transaction processing framework using parallel processing
- Real-time processing framework for Enterprise Information Integration (EII)
- Cost & processing efficient data storage solutions
- Integrating compressed & indexed flat files with data warehouses

Compact Services

Complete Enterprise Information Integration (EII)

- Diagnostics
- Solution Development (off-shore or on-shore)
- Data Architecture
- Master Data Management
- Data Quality
- Real Time EII
- Systems Architecture
- Data Warehouse Assessment
- Data Warehouse Design
- ETL Design & Development
- Metadata Management & Repositories
- Data Warehouse Performance Optimization
- Platform Migration

Unique Ab Initio Expertise

- Design & Development
- EME Design
- Application Migration from other ETL Platforms
- Continuous Flow Processing
- Metadata Driven ETL
- Performance Optimization
- Data Profiler, Shop for Data & Plan>IT
- Center of Excellence (COE) Development
- Project and Staff Mentoring

CLIENT SNAPSHOT | MANUFACTURING

Knowledge transfer is part of every project we undertake. This collaborative project approach is instrumental to the long-term success of your solutions.

We build knowledge transfer directly into the overall project plan and make sure that when we leave the project, you feel fully empowered to maintain and extend your solution. Our approach is adaptable to your needs. Whether its through in-house education and training, or mentorship programs, we've learned that the more knowledgeable you are, the more benefit you will realize from your Compact solutions.

MAJOR PAPER PRODUCTS MANUFACTURER IMPLEMENTS AB INITIO DEVELOPMENT BEST PRACTICES

This major manufacturer of paper, packaging, and building products chose Ab Initio as the technology platform for Enterprise Data Integration. The client realized the benefits of training their employees in Ab Initio design and development, and wished to establish the best practices for the entire lifecycle of Ab Initio development.

The client selected Compact Solutions to provide training and mentoring to their employees in Ab Initio development best practices. Compact's experienced Ab Initio architects and designers worked closely with management and developers to customize Ab Initio Development Best Practices specifically for the client's environment. Compact experts also helped the client's management team define the other elements of their enterprise-wide data integration architecture.

In addition, several of the client's employees were mentored in the use of Compact best practices during the project development phase. A complete set of best practices were deployed covering the complete software development lifecycle (SDLC), from requirements to testing and deployment.

RESULTS

- Self-sufficient IT employees, capable of maintaining and enhancing many aspects of their solution.
- Lower maintenance costs.
- Ability to adapt and apply Compact's best practices to all areas of internal SDLC, ensuring higher quality results and efficient processes.
- Ability to extend solution capabilities beyond original scope.
